

Proposal on the magazine

Rob O

- To attempt to bring down production costs per issue further to under £1000 and task a member of the SG (with the support of the full-timer) to oversee distribution and the collection of sales money for the magazine.
- To review the data after six months to assess the success or failure of reducing the deficit on the magazine.
- To explore the possibility of a supporters standing order form (to include a subscription and optional donation) for those who support rs21 to some extent but do not/do not yet wish to become members.
- To continue to discuss with members increasing our subs base so we can operate a small surplus without cutting back our operation.
