

Introducing an elected social media editor position

Motion passed at the July 2022 rs21 All Member Assembly.

The rs21 social media team not only publicises website content that has gone through an editorial process, but also often is our first point of response to major breaking news. The team has done brilliant work collectively drafting responses to breaking news over the past years. This motion seeks to do two things:

- To empower the team to rapidly write social media posts with more confidence in its mandate from the rs21 membership
- To add a bit of structure to the team, creating a point of contact between the social media team, the website team, and the Steering Group

This assembly resolves to introduce a new position of Social Media Editor. This position will be elected in the same way that Website Editors and Assistant Website Editors are elected. The Social Media Editor will have a mandate to approve posts on rs21 social media including short statements putting forward rs21's politics in response to breaking news. They will also convene the social media team with the support of the Publications Worker, making sure there are enough members involved to run the instagram, twitter, facebook, youtube, and any other rs21 social media accounts as required.
