

# Political education in rs21

*Motion passed at the July 2022 rs21 All Member Assembly.*

## **The assembly notes**

rs21 is a group with a focus on renewing rank-and-file militancy and organisation in workplaces and other campaigning areas.

The consciousness of the working class is “uneven and combined” and the far left is now recruiting radicalising individuals from Labour Party, union, NGO, and grassroots campaigning.

A political education programme is essential to help rs21 embed effective organisers with a revolutionary political horizon.

This programme must provide political and technical organising education that responds to the different starting points of new members and the varied contexts in which we organise.

The “Winter Programme” represents an important experience in political education for rs21.

In an accompanying bulletin piece, John S has proposed a “three-fold programme” to address the need to broaden our political education processes.

## **The assembly resolves**

- To seek volunteers for a working group from this assembly, and to instruct the steering group to seek further volunteers from members not in attendance.
- To instruct the working group to discuss the “three-fold programme” and reflect on the “winter programme”, with an expectation for a detailed plan to be proposed at a future AMA.
