

Motion: Regularity and formalisation of internal communication

This motion was passed at the June 2023 All Member Assembly.

Staying in touch with each other is often a very dry logistical challenge. The organisation was founded at a time when one could be certain that everyone had some social media, and that this media platform functioned. Now, this is less true. Assuming everyone reads the Facebook or Discord is wrong, or, as in the case of Facebook, we cannot even be certain to see the posts that are made.

As such, to be a functioning organisation, there must be clear methods by which there is substantive communication with each other and where comrades can find out about key activities. This motion is brought to concretise this and to ensure we have in writing something that can be reviewed by new members when asking, 'how do we stay in touch?'.

As such this motion resolves:

- That the **Internal Bulletin** is to be distributed monthly, with a deadline for submission of 10pm on the last Friday of every month. The Steering Group (SG), organiser(s), and publications worker will then ensure this is distributed in the following week via email to all members.
- That the regular **rs21 newsletter** from the SG to members, which is currently being tested, becomes permanent.
- That this shorter newsletter of key meetings, local branch meetings, and other organisational matters is distributed by the SG, organiser(s), and publication worker fortnightly (every other Friday) over email to all members.
