

## **Organising at work conference**

*Proposed by the Steering Group plus Colin F, South London; Ray M, Edinburgh*

We support plans for a major conference on organising at work in 2023 and will contribute to organising and promoting it. This should be a political priority for rs21 this year, to build on the work we are doing around Workers Can Win. We would like to see a successful conference, with a rank and file orientation, lead to an ongoing network that can provide in Britain some of what Labor Notes does in the USA.
