

END THE GENOCIDE

Israel is committing genocide in Gaza right now, and the West is arming it and backing it. They're murdering people in their thousands: Israeli bomb strikes are levelling hospitals, schools, places of worship and refugee camps. Half of the victims are children. Our leaders know this, and they just lie to us and carry on.

But they aren't getting away with it. Protests for a free Palestine have erupted across the world. In London we're seeing some of the biggest protests in British history to demand an immediate ceasefire. **We're demanding freedom for Palestine, not just aid.**

TAKE ACTION

- **Build networks to organise local protests, occupations and school strikes to demand a ceasefire**
- **Organise workplace actions for Palestine solidarity in your trade union**
- **Fight for Boycott, Divestment and Sanctions (BDS)**
- **Join actions to stop arming Israel**

Sunak, Braverman and Starmer are in panic and frozen. Braverman tried to make the police come for anyone chanting 'From the river to the sea, Palestine will be free!'. But the chant is rooted in a simple truth: **freedom for the Palestinian people can only come with a single democratic state for all who live there.**

Across the Middle East, from Baghdad to Cairo, millions are in the streets for Palestine. **The imperialist ruling classes are terrified that this solidarity will ignite a new Arab Spring**, where working people will liberate everyone in the region, bringing down the Israeli apartheid state and the Arab regimes that prop it up.

Palestinian Resistance across the occupied territories is an inspiration to all of us. Palestinians are calling for our solidarity, and we need to keep showing it. We must respond to their call to disrupt the Israeli war machine and its political backers here in the West.

Whoever we are and wherever we are, we can do something to support Palestine. We have to demand that our MPs and councillors call for a ceasefire and work meaningfully to end the siege of Gaza. We should organise in our trade unions to support Palestine and agitate for an arms embargo against Israel.

The Palestinian struggle has sparked a new global movement. Their demand for freedom and justice is also a demand for a better world, for an alternative to war, oppression and capitalism. **That better world is not only possible, it is necessary. The time to fight for it is now.**
